Tastefully Yours Food Setup

- Food placed on the front table of the booth must be under a sneeze guard (bring your own and/or provided by the Foodbank-limited quantity) or suitable chafing dishes placed with the hinged lid(s) towards the customer or suitable chafing dishes with cut out lids.
- If cooking on site, you will need to bring your own cooking equipment.
- If the open foods are placed and portioned from the back table, protection from the public is not necessary.
- Restaurants may bring as many serving utensils as necessary with multiple back-ups. These should be transported in a clean plastic or metal container with a lid from the restaurant to the Hampton Roads Convention Center.
- If you choose to prepare and/or cook foods on-site (chopping, slicing, dicing, sautéing, etc.), you will still need access to a 3 tub sanitation station. The Foodbank will provide these as necessary and determined by the VDH-Hampton office for placement in the event area.
- The Foodbank will provide each restaurant with pop-up wipes for keeping hands clean during the event. Full-service hand-washing stations with drip bucket, soap and paper toweling will be provided by the Foodbank as necessary and determined by the VDH-Hampton office.

The Hampton Fire Marshal permits propane tanks to be used for cooking demonstrations, no larger than 3lbs. However, if there are going to be multiple points of cooking, we'll have to discuss the entire event plan with him and have him sign off. Small fry Daddy's are fine.
